

Nikhila Sundar

Edison, NJ | 732-754-7976 | nikhilasundar03@gmail.com | [LinkedIn](#)

EDUCATION

New York University

Computer Science (M.S.) - Concentration in Artificial Intelligence

- Relevant Coursework: Algorithms, Machine Learning, Computer Vision

Rutgers University - New Brunswick

Computer Science (B.S.)

- Activities: Data Science Club, Sangam (South Indian Club), Rewriting the Code (RTC)
- Relevant Coursework: Data Structures, Software Methodology, Algorithms

WORK EXPERIENCE

Rutgers University

CS112 Grader

Piscataway, NJ

Jan 2023 - Dec 2024

- Proctored 12 midterms/finals for CS112 (Data Structures) and supported 200+ students per exam
- Graded 1200+ exam papers with 90% accuracy and minimal regrade requests, providing feedback to enhance student learning

Fiserv

Technology Intern

Berkeley Heights, NJ

Jun 2024 - Aug 2024

- Modernized code that converts XML files containing merchant transactions into fixed format files in order for transactions to be verified and processed; migrated it from Java 8 to Java 22 and converted it to a Spring Boot application, cutting build time by 15%
- Experimented with integrating this code to AWS services (S3 and SQS)

East Consultancy Services

Intern

Bengaluru, India

Jun 2023 - Aug 2023

- Contributed to implementing OCR (Optical Character Recognition) to read Aadhar cards (identification cards for Indian citizens) and obscure identification numbers for security, achieving 80% in accuracy

Code Ninjas

Coding Instructor

Piscataway, NJ

Mar 2020 - Jun 2021

- Led weekly recitations for 10 students, graded homework, and enhanced coding learning curriculum through the creation of coding games and activities, leading to increased student engagement by 50%

PROJECTS

Stock Market Tracker

- Currently working on a real-time stock market price-alert program in Python with an interactive search, top views, above/below threshold alerts, and an algorithm to determine the best time to buy/sell certain stocks

Pico LLM

- Built an PyTorch pipeline with a team for K-gram MLPs, LSTMs, and Transformers (KV cache) with structured logging (loss/accuracy/perplexity), and automated analysis (generation reports, heatmaps)

Pizza Store Application

- Developed an Android application in Java that replicates an online platform for a pizza store

Times Series Forecaster

- Implemented Meta's Prophet to accurately forecast time series data using dates and anomalies; submitted to Rutgers Data Science Club's Fall 2023 Datathon and won

Banking Platform

- Coded a Java program that replicates an online banking platform that deals with deposits, withdrawals, and other banking information

Facial Expression Predictor

- Programmed neural network that processed and predicted facial expressions from Japanese people

ACHIEVEMENTS

- Won Rutgers Data Science Club's Fall 2023 Datathon for most advanced/unique algorithm and code overall (2023)
- Received National Center for Women in Information Technology Award for Aspirations in Computing - Certificate of Distinction (2021)

SKILLS & INTERESTS

Skills: Java, Python, C/ C++, Git, AI/ML, SQL, Android Development, Spring Boot, AWS, LLM agents

Interests: SWE, Data Science, AI/ML Development, Mobile Application Development, Cloud Computing, AI Agents
